General information:

Dental stone is not considered toxic. Irritant effects on direct contact are limited to the mucous membranes of the eyes. In case of accident or unwellness, seek medical advice immediately (show directions for use or safety data sheet if possible). Remove victim out of the danger area. Remove contaminated, saturated clothing. If unconscious but breathing normally, place in recovery position and seek medical advice. Do not leave affected person unattended.

Following inhalation:

Take the affected person out of the danger zone and into the fresh air in self-protection.
Keep injured person calm and protect from hypothermia.
If breathing is irregular: give artificial respiration.
Call a doctor immediately Provide fresh air.

In case of skin contact:

Clean affected skin areas thoroughly under running water with soap.

After eye contact:

Rinse the eye for 10 minutes under running water, protecting the uninjured eye.
eyelids wide apart. Do not attempt to mechanically remove set plaster residues yourself.

Following ingestion:

Rinse out mouth, spit out liquid again.
Immediately - if conscious - make the person drink plenty of liquid (water).
Call a doctor immediately. Rinse mouth. Let 1 glass of water be drunken in little sips (dilution effect). Get medical advice/attention if you feel unwell.
